About SEPC

Services Export Promotion Council set up in 2006 by Ministry of Commerce & Industry, Government of India is an apex trade body to promote exports of services from India.

- To create business opportunities for the services exporters aspiring ones and the existing ones.
- To facilitate exports by formulating business enablers like incentives and designing suitable market oriented promotional events and activities.
- To enable members avail various grants and incentive schemes under Ministry of Commerce, related line Ministries and State Governments.
- To act as a platform between Government and Industry in order to provide policy inputs, take up issues of industry, provide insight on global markets (existing and emerging) in terms of opportunities, challenges and regulatory frameworks.

ROLES & RESPONSIBILITIES

FOCUS SECTORS:

Overview - Indian Education Sector

India occupies a significant position in the global education sector, with one of the world's largest networks of higher learning institutions. With **nearly 26% of the population in the 0-14 age group**, the sector offers immense opportunities for growth and long-term development.

The number of colleges in India reached **52,321 in FY26 (as of August 11, 2025), up from 42,343 in FY20**, while universities grew to **1,355 in FY26 from 760 in FY15**. Notably, more than half of these institutions are located in rural areas, reflecting the sector's wide reach.

India's education market is projected to **reach Rs. 26,94,617 crore (US\$ 313 billion) by FY30**. Within this, **higher education, valued at Rs. 5,75,000 crore (US\$ 68.06 billion) in 2024**, is expected to nearly double to **Rs. 11,60,000 crore (US\$ 134.84 billion) by 2033, growing at a CAGR of 8.10%**.

Online and technology-driven learning are transforming the landscape. The online education market is expected to expand by **US\$ 2.28 billion between 2021 and 2025 at a CAGR of almost 20%**, while the Indian edtech sector, currently valued at **Rs. 64,875 crore (US\$ 7.5 billion)** is projected to grow nearly fourfold to **Rs. 2,50,850 crore (US\$ 29 billion) by 2030**. Increasingly, higher education institutes are developing digital programmes to meet this rising demand.

The sector has also been a steady magnet for global capital, with **FDI equity inflows standing at Rs. 72,210 crore (US\$ 9.98 billion) between April 2000 and March 2025**. With strong fundamentals, a young population, and rapid digital adoption, India's education sector is poised for sustained growth.

In the **QS World University Rankings: Asia 2025** India stands out with two universities in the top 50 and seven in the top 100, led by the **Indian Institute of Technology Delhi (IITD) at 44th place**. The edtech sector drew **Rs. 1,23,883 crore (US\$ 14.4 billion)** in private equity and venture capital from 2015-2025.

Union Minister for Education, **Mr. Dharmendra Pradhan**, announced the establishment of three **AI Centres of Excellence (CoE)** in New Delhi, focusing on **Healthcare, Agriculture, and Sustainable Cities**. These CoEs, aimed at realizing the vision of "**Viksit Bharat**," will be led by leading educational institutions in collaboration with industry partners and startups.

The **National Education Policy (NEP)**, which will be fully implemented over the course of this decade starting from 2021-22, will have a strong focus on high-quality vocational education. Under the National Education Policy 2021, the government will set up regional and national institutes for virology, **>15,000 schools, 100 new Sainik schools, and 750 Eklavya** model residential schools in tribal areas.

The Union Cabinet, led by **Prime Minister Mr. Narendra Modi**, has approved the **PM Vidyalaxmi scheme**, aimed at providing financial support to meritorious students to ensure that financial constraints do not hinder their pursuit of higher education. This initiative aligns with the recommendations of the National Education Policy.

Going Global Partnerships launched **UK-India Industry-Academia TNE Grants 2025-26**, offering up to **US\$ 23,294 for projects starting September 30, 2025**, to foster UK-India education and industry collaboration.

The education sector has seen a host of reforms and improved financial outlays in recent years that could possibly transform the country into a knowledge haven. With human resources increasingly gaining significance in the overall development of the country, the development of the country's education infrastructure is expected to remain the key focus in the current decade. In this scenario, infrastructure investment in the education sector is likely to see a considerable increase.

India's education sector is rapidly evolving into a global hub of learning, innovation, and skill development. With strong government support, rising digital adoption, global collaborations, and a young demographic base, the sector is well-positioned to expand its global footprint and shape a future-ready workforce. Going forward, India is set to play a leading role in redefining education worldwide, blending technology, inclusivity, and academic excellence to drive sustainable growth.

Overview - Indian Education Sector

- Meeting with Education Ministry and relevant departments.
- Conference – 2 days high powered conference with National & International experts from across the globe.
- Exhibition – More than 100+ exhibitors from top institutions showcasing best practices to the global participants and seeking tie-ups and collaborations.
